REMARKS:

1, The above mentioned data were measured at 230VAC input and 25°C.

2, Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf & 47uf parallel capacitor.

3, Cut the AC input before checking any mal-phenomenons.

4, Make sure the INPUT&OUPUT were in right situation before connected to power supply.

5, Be ware of high power pressure may caused by short circut when installing metal casing products.

6, Please contact us at info@xinrealpower.com for further solution if any unforeable problem happens.
